ducted by State President Rob't L. Johnson, the people were welcomed to Caldwell Springs by W. J. Me-Chesney. Mr. KeClresney is a fluent speaker and by his well chosen remarks made every one feel at home.

State President Johnson responded and spoke until twelve e'clock and assured the audience that he would finish 11- remarks in the afternoon, which promise was filled to the full

Bro. Johnson dealt many hard blows to the "trusts" and showed his hearers, beyond any shadow of doubt that the fight was between the trusts and the people, and that by persuasive argument we would win the filigt, if we would only stand together and vote together. He left no in raising subscription for stock sufmidd'e ground, he said: "he that is net for us is against us."

He showed to the people that we needed no new party but if we would get together and let our demands be known, that the old parties were sufficient. His remarks seemed to be music for the occasion, which was well taken and the great crowd show. Preciated by all, ed by their attention that they were. Peace and pleasure was promount

THE PICNIC AT HUBRICANE.

Not since the days of Thomas Jefferson and Henry Clay has there been a more enthusiastic gathering than there was at the trurriean Camp Ground, Saturday Sept. twelth.

Farmers with their families in wagons, and carriages of all kinds. Horsemen, and on foot, but all carring well filled baskets, boxes and trunks, began to arrive early in the morning, and continued to arrive. until eight hundred or one thousand tillers of the soil had gathered together in one mighty throng. ten o'clock the Heath Local String Band began to play "My Old Keutucky llome." The farmers then followed the band into the great

The exercises were opened in the neual manner in which the locals open all their meeting, by song and prayer.

President Johnson began his adhour and one half hour. The audience seemed greatly surprised when he informed it was time to spread the feast, so interceted were they, the time flew fast.

He led them from the Garden of Eden on by Abrahams well, the first he assigned to speak in their respecmmovable property of man, saw the torienl guns of this campaign. farmers in the fertile fields of Gosben came with them out of Egyptian bond age, on to where they left their fathers tombs in Euorpe and came to America where they could worship a true and living God and own thir own homes. They returngreatest organization that has ever been started by mortal man, "The Farmers Union." He assured us much of our present enjoyment depends on our future prospects. Present possessions held in uneertainity, or with the expectation of loosing them in a short time, affords but little satisfaction. Hence though a man may have wealth, a comfortable home, popular talent and honorable employment, yet if these be held in unrighteousness, without a reasonable expectation of future bliss, they suffice him not. One thought of eternity destroys all his comfort.

SCHOOL IMPEDIMENTS. Teachers, when you became aware

the fact that your school is not ant it shoubi be, it is then time for on to lookout for the impediments. When you conclude your school aos not measure up to the standard hese three questions you should ask courself: is it the patrens, is it he pupils, or is it myself? Meditate, and answer. No it is not the parons, for they are sending their children. It is true they haven't as nany books as i should like for them o have, but it seems the fewer looks, the more progress we should rake in them So that's no excuso is it the pupils? No. They are ere. They are all apt, and seem city on the playground, always edy to consume the jast moment recess Aiways watching with at in hand ready for the time lin inlitedly it is not the colls

GENERAL BUSINESS OUTLOOK.

There are definite indications of an actual and anhatantial improvement in trade conditions. The more favorable reports regarding industory the promise of abundant crops, and expectations of expanding trade all contribute to increase a hopeful est-

look Under such eireumstances confidence must also increase, and business expand greatly. It begins to look as if the tide had turned, and if the railroads get into position to buy materials freely and go ahead with construction work on a broad scale there is bound to be a decided revival among industrial interests. While there are so many favorable features it is well to keep cool and not be carried away with over enco in the southern part of this conn. | thusiasm generated for purely specularive objects. Keep Your **Bowels Open**

A Safe Certain Home Remedy that is Sold By All Druggists

A fact any doctor will verify is that

constipated people auffer most from disease. Regular bowel action is absolutely necessary to health People who are constipated either part or all of tha tima must use something to make their bowels move. This should not be a vio-ient purgative or a cathertic that morely tears its way through the bowels amptying them of waste matter for the time but leaving them in a weakened state that prolongs the constipated condition.

Dr. Caldwell's Syrup Pepein is an easy. pleasant, natural laxative that removes the waste matter and establishes regular, daily movements without pain or gripe Children and delicate women should naver be given strong physic for it not only weakens the bowels but the entire aystam. Dr. Caldwall's Syrup Pepsin serves as a tonic and an aid to digestion well as a laxative that is certain in its effect upon the most obstinate old cases and yet safa and pleasant for a baby. With the first few doses the ill effects of constitution, such as dyspepsia, indi-gestion, ilver trouble, billousness, flatuency, sour stomach, sick headache, bloat ed stomach, etc., quickly disappear It is a remedy that should be in every home for every member of the family at some time has naed of a safa, sure laxative. Mrs. J. C. Cooper, Chicago, Ill., writes:

PARTE BIG MIMIC CITY

Pain's Big Pompelan Spectacle Each

Night at the State Fair. No scenic representation could be more realistic than the magnificent view which is spread out before the speciator in fain's elaborate production 'Last Days of Pompell." The scenic city spreads out over an uren of four acres of ground, and so perfect is the work of the painter in the perspective that one seems to be looking upon a real city and a landscape that stretches seemingly away for miles. Real massive buildings twenty to fifty feet high, foom up in the foreground, representing the palaces, temperately, of the picturesque ancient clar, white huge thumphal arches adom its streets. Towering above all these is day, in spite of every time and labor saving device that can be grovided. Pompeli is to be destrated again.

Not the ancient offy thit needled among the Italian hills at the foot of Mi. Vecuries, but the big scenic city in Pain's vast spectacle of Last Days of Pomped," that will be seen at the Kenwoky State Fair. This mimic city represents with ideal accuracy the fated city that perished in the First century of the Christian era. The scenery used in this production covers many times that space. The view is said to be marvelously compot and the torically accurate, being tire what the archeologists now suppose the analogs city was at the time it was destroyed. The whole about good to give haif a hundred are lights and calciums is most beautiful. Ab one sits in the vast amphitheatre and gases on the scene before him he sees the tail Vethe sky; below are the houses, tem' ples, arches, etc., and to properly reprecent these latter many real structures twenty to forty feet in height are blended in with the "picture" in the background. The scene opens finished with exceptionally fine clay. with a fete day in the ancient city and for neward of an hour the a lence to horses are located just south of the entertained with a vivid 1 oduction of the sports and feats of the hippodrome, exciting charlot races, sensational aerial and acrobatic feats, pretty ballets, imposing and gorgeously costumed processions, choruses, music, etc. The tragic dramatic episodes of the spectacle are shown in pantomime. The fetes are interrupted by the terrific eruption of Vesavius and the destruction of the city by the earthquake, which is a scene thrilling beyond description, and brings into action all the skill and ingeniousness of Pain's artists. Following these stipring scanes there is presented a basutiful exhibition of fireworks, and those the famous Pain have never reallyed

the full meaning of the word before Railroads will make apecial rates from nearly all surrounding towns on the date of this exhibition.

The most magnificent display of pr rotechnies ever witnessed in this seetion of the state is promised in consection with Pain's big spectacle. This display is, in fact, the crowning "feature" of the marvelous exhibition, and as Pain has long enjoyed the reputation of "king of pyrotechnists" in both England and America, it is more than likely we shall behold something unuaually fine iu pyrotechnic novelties on this occasion. Among the most alaborate "set pleces" shown will oa a mammoth revolving fountain of fire; Alladin's Jeweled Palms, and the beautiful Pyramids. These are only a few of the larger special pieces that will be shown. For the edification of the little folks there will be be a large number of comic fireworks devices, such as the "Devil-Among the Tailors." the huge walking elephant, the flying pigeons, the acrobatic monkey, the flying fish, etc.

TOBACCO.

Tobacco will be a bigger featura clauses are more amperous. Classes types: Red Loaf, Bright Loaf, Olganells wrapper and Bright Trash. The dark types are black wrapper, long or African look, French lank, Italian look Green Miver leaf and stomming leaf. The M. C. On account of the very low referred rates a much target attendance of college students than seual is expected, and Prof. Anderson in actively working for large delegations from all the various collegiate institutions in the state. All the fraternal organizations of Louisville and other cities and towns of the state are invited to join in an effort to make this one of the ferent days of the Fair. On this the judging in all departments will begin. Horse and cattle awards will be made in the new show pavilion, while all other livestock, poultry and other departments will be judged in arenas especially prepared for that purpose.

Wednesday, Sept. 16th, will be Lon isville Day and Southern Indiana Day. Mayor James P. Orinstead of Louisville will be chairman, and Jacob Best. niavor of New Albany, and E. N. The question of securing the adoption by the people in 1909 of the Bonworth good roads amendment to the Constitution will be discussed. With low railroad rates and the State Fair attractions, it is thought a record breaking crowd of good road advocates will

nated as Equity Day and Grange Day. Campbell Cantrill of Georgetown, Ky, president of the Kentucky Branch American Society of Equity, has been named as chairman and F P Wolcott of Covington Ky, Master of the Kentucky State Grange, vice chairman. Arrangements are being made for an immense parade of the members of the Society of Equity, composed of the niany tobacco growers in both the dark paich and burley districts, through the streets of Louisville that This powerful organization, as sisted by that noble band of true and enlightened farmers known as the Pat- | ons, Field Seed and Grain and Tobacrons of Husbandry, are uniting their efforts and walking shoulder to shoulder in this move and propose to make it an event of fac-reaching importance and magnitude to the Kentucky farmer. Miss Alloe Loyd, the daughter of the Society of Boutty, will deliver an address. The judging in all departments except horses will be concluded this day, and in the afternoon there will be a grand parade of all the prize winners, horses, mules, jacks and cattle in the Livestook Pavillon, with ribbons attached and animals placed in the order the awards were made.

Saturday, the last day, will be Byerybody's 'ay. Anyone not classed under any other day will certainly be included in this.

OREAT LINE OF FREE ATTRACTIONS

In line with its policy to put on only the greatest attractions that can be secured, the Kentucky State Pair management has closed a contract with Frank P. Spellman of Cleveland, O. for what is believed to be the best line of free attractions ever seen at a Southern Fair. These attractions will be seen in front of the grund-tand each day, Including Spottman's Per forming Bears and ien other free at

tractions, such as trajeze acis, inid

air performances, etc. A Japanese froups of gymnasts and equilibrists, excelling to their the env thing ever seen before in Louisville has been engaged especially for the State Fair, and will be seen exclusively in Kentucky at that time. In addition to the more thrilling of the well-known acts of balancing and gymnastic work, they have devised as versi features which will be for the armit time introduced here.

The thriller of free attractions, how ever, will be the troupe of trapeze per formers, including several men, women and a tiny fot which is hurled by its beels twenty-five feet through the air and is safely caught by one of its elders. Accidents do not occur in this act, but despite their perfection a net is spread for a possible emergency. 🗪 that even if an accident should occur no fatality would result.

The shows already engaged for the Stretch" are Fereria's Trained Wild Animal Congress, the Dieky Wild West Show and Cow Boy Indians, the Dark Town Fire Brigade; Hosein and Hell Muchanical Device; Johns town Flood, Paince of Illumions; Disc. tric Palace, and many others which will be added later. This is enough to insure every visitor that there will be something doing every minute

EVAPORATION.

Plage & Very Large Part In All Agr eultural Processes.

Myaporation plays a very large part a all agaicultural processes. The rapidity with which evaporation goes on determines to a large extent the rapidity of growth. It should be evident to any person that the building up of a plant can progress only as fast as the food can be carried to it, and this food can be carried only as fast as the water moves to the plant, as all plant food is hald in solution in the liquid that carries it.

The evaloration from the surfaces of the plant supplies the motive power for the liquid that is in the internal portions of the plants, if the day t a hot one and the atmosphere is dry. the drying up of the moisture on the plant leads to the instant supply of more meisture by the plant, and this to an important factor in the process of sap movement.

Time is the remon that in humid chimates where the sky is obscured by clouds for a large part of the time, the processes of growth are so slow that many things fall to ripen in an ordi nary season, explainr Parmers Review The farmer sometimes complains at a long period of unclouded sky, but if his plents have enough water to supply their needs they are making an unusually rapid growth in the time in which they are receiving an upusual amount of sunshine

it is for this reason that the weath er turces now sapply data as to percentage of conshine during a given period. Thus in a recent report of the lifteets weather bureau it was stated that for the week covered by the report the amount of sunshine was 65 per cent, which meant that fects the evaporation, and this in turn affects the development of crops Under bright conshine crops develop more rapidly than under clouded skies

Mitrogen teta, which is possibly the most valpable part of a plant. It is also a constituent of chierophyil, the green octoring matter of plants; bence with limited supply of aitrogen, the eaves will have a sickly reliew color. Plants with large, well-developed eaves are not suffering for nitrogen. An shundance of this sugstance will produce a juxuriani growth of leaf and stem, but it will retard maturity with servale w111 frequently cause the crop to "lodge" Therefore when srope, such as cereals, tomatoes, potatoes, etc., are to be matured, an over supply of altrogen is injurious; but with crops, such as lettuce, cabbage, etc. which are harvested in the green condition, an abundance of nitrogen will, other fertilizing constituents being present, tend to produce a string, vigorous growth and give crispness or quality to these crops -Prof R. Work Must Be Carefully Done If the Flock la to Be Improved.

There is no work in the ponitry

To have the nerve to reject each year all birds which fail to meet our ideal of the breed, or our nearest approach to it in our own flock is to talse the average quality of our birds to one year more than the introduction of pure bred males in two. Each season brings but a few extra good birds; our effort must be to know these and to weed out the worst. which we cannot do unless we study the standard, declares Wallace's Farm In many respects the Tolkho er. of the dead, and of eternal judgment

"The foundation of repentance from Marion, · · · Kentucky. dead works, and of talth toward God, of the doctrine of baptisms, and of laying on of hands, and of resurrection

> A Founda tional Experience is in the words "repentance from dead works." Not repentance from sin. Sin is not a dead work, but rather a work that kills it is the assassin which by slow poison or by dag

work upon the merit of which one depends for salvation apart from Jesus Christ, it is dead because it is separated from the sources of all spiritual life. The man who depends upon his character as the ground of justification before God. while he declares that he has no need of an atoning Saviour, is relying unon a dead work. The man who depends upon salvation through baptism or any other external ordinance is trusting to a dead work. Dead works are like wax fruits manufactured and hung upon a tree. They look like fruit, but they are not, because they lack the

ger thrust mur-

ders the soul. A

dead work is a

life of the tree. Faith Toward God.

A Foundational Attitude of soul in the words "faith toward God." The opposite of faith toward works. There can be no growth without this soul attitude toward God. As well try to make a plant grow that never turns its ienves townnl the sun. As well seek the development of animai life without the light. It is more than faith toward truth. One may befleve that the flible is the word of God without trusting God for saivation. One may even believe in the delty of Christ without accepting 'hrist as the Saviour. One may heieve in salvation by grace without anrogriating grace for his own salvaion. Faith toward God in Christ means salvation. Fulth toward God the Holy Spirit means power. Fuith

toward God the Father means sonship and worship. Doctrine of Baptiams.

A Foundational Disposition is in the words "the doctrine of haptisms." There may be reference to the ceremonial washings of the lews or to Christian baptism, perhaps to both. ilm the nuderlying meaning is the same in both cases. The Jews practiced these ceremonial washings because they believed that God had commanded them. The Christians bajdized because Christ commanded It. The disposition of the soul in both cases was the same, though the disposition of the Christian marked a higher type of spirituality than the disposition of the Jew In both cases, however, that disposition could be defined as the spirit of obedience. it was a desire to please the one they

worshiped aml loved.

Resurrection of the Dead. A Foundational Faltir is in the words "resurrection of the dead." Both words in the Greek are without the atticle and might be translated resurrection of dead things, whether souts bodies or institutions. It is fundamental that a Christian believe in resurrection, which means the power of God to give life to the dead. Of course, he helieves In the resurrection of Jesus Christ, and he does not explain it away by silly talk about suspended animation. His Lord was crusified, dead and burled, and rose from the dead on the third day according to the Scriptures. The very body that was field away in weakness came forth in power. The very body that was entombed a natural body came out a spiritual body, not a spiritual spirit, but a real body, aithough no longer subject to natural law, heing ever hereafter permeated and dominated by the Spirit. Of course, the Christian believes in the resurrection of his own boily. "All that are in the graves shall hear the voice of the Son of God and shall come forth."

Laying on of Hands. A Foundational Equipment is in the words "laying on of hands." Beyond doubt this refers to the enduement of the Holy Spirit. The apostles iald their hands upon people and they received the fluly Spirit. What relation the laying on of hands had to the imparting of the Holy Spirit we are not told.

As to whether one person to-day has the power to impact the Holy Spirit to another we do not know. If It be true, then our difficulty is in fiming the person or persons who have such LER

Eternal Judgment.

Foundation Expectation is in the "eternal judgment." Judgmay mean a decree for us or against us, though its usual meaning is a decree of condemnation. Judgment for the penitent believer is eternal, and judgment against the impenitent sinuer is eternal. Cerrainly there is no teaching that either decree will be revoked after death.
